WASHING ADDITIVE FOR E-COATING - 5 L TANK

Pag. 1/2

Colour **Silver**

[L: a: b: c:]

Product description

3009011 - washing additive for e-coating is totally compatible with the Kliar Line e-coatings. This additive improves the wettability of treated surface and, as consequence, avoids the presence of defects and streakings phenomena on the e-coating deposit caused by the stagnation of rinse water drops on the surface itself.

Recommended applications

3009011 - washing additive for e-coating on every surface treated with the Kliar Line products just before the drying process.
