

GF2N 2N yellow gold flash solution for bath plating 0.8 g/l (ready-to-use)

- 2N or 18 kt yellow gold color
- Decorative layers up to 0.2 micron
- Good color repeatability
- Low gold content
- Nickel, lead, and cadmium free
- Alkaline solution

GF2N is a gold electrolyte intended for bath plating, which deposits a uniform, shiny layer in a 2N color. 2N can be described as a pale yellow with green undertones and considered to match 18 kt yellow gold plating in most international markets. GF2N is intended for decorative use therefore has been designed for flash plating permitting a deposition thickness of up to 0.2 microns. This yellow gold plating solution is Nickel, Lead, and Cadmium free, and despite being a traditional cyanide based alkaline bath, it is easily transported given the toxic level contained is below the limit established by international transportation laws.

Metal concentration	0.8 g/l (Au)
Volume	1 Liter
Purity (%)	99.9
Density (g/cm ³)	19
Hardness (HV 0,01)	90 - 100
Thickness (um)	0.1 - 0.2
Appearance	Shiny
Color	2N Yellow
