

## RH2PB Black rhodium for pen plating 2 g/100 ml ready-to-use

- Black rhodium for pen
- Excellent to highlight black diamonds
- 100% Arsenic free

RH2PB is a black rhodium for pen plating. It is great selection for doing two-tone designs or detail work such as black inlay, but most commonly used as a product to highlight black diamonds by applying to the prong area. The formulation is 100% arsenic free both in the metal deposited and in the chemical itself.
