

RH2PW White rhodium for pen plating 2 g/100 ml ready-to-use

- Good for large flat surfaces
- Balanced level white color
- Homogenous distribution

RH2PW is a white rhodium for pen plating. It has been developed to be a good formulation for coverage of large or flat surfaces. Maintains a steady distribution speed with a balanced and homogenous white color completely uniform throughout the entire surface area. Limited foam development allows for the operator to achieve color repeatability with ease due to clear visibility of the substrate.

Metal concentration	2 g (Rh)
Volume	100 ml
Purity (%)	99.9
Density (g/cm ³)	11.2
Hardness (HV 0,01)	800-900
Thickness (um)	0.02-0.10
Appearance	Shiny
Color	White

Packaging
