

RH2W White rhodium for bath plating 2 g/l ready-to-use

- Easy to maintain white rhodium
- Ideal for large flat surfaces
- Efficient at room temperature
- Accurate consumption control

RH2W is a ready-to-use white rhodium for bath plating. This white rhodium plating electrolyte is commonly used in larger rhodium installations due to the minimal components needed for maintenance. The deposition speed is slower than other formulations allowing for accurate consumption control. This balanced deposit also makes it an ideal choice for large or flat surfaces permitting complete surface coverage in low current density areas. RH2W is efficient at room temperature allowing minimal water evaporation.

Metal concentration	2g/l (Rh)
Volume	1 liter
Purity (%)	99.9
Density (g/cm ³)	12.4
Hardness (HV 0,01)	800-900
Thickness (um)	0.02-0.20
Appearance	Shiny
Color	White
