

GFPINK Pink gold flash solution for bath plating 0.6 g/l (ready-to-use)

- Flash gold plating
- Working temperature: 60°C
- Good penetration power
- Good distribution

GFPINK is Legor Groups latest installment of red gold solutions developed to meet the plating industries mature keen eye for color. A light pink color with true white undertones, presenting a distinctive pink finish. Given that the final layer is 20KT gold in title, the layer is also more tarnish resistant when compared to the common 18KT gold titled solutions found on the market.

Metal concentration	0,6 g/l (Au)
Volume	1 liter
Purity (%)	99.9
Density (g/cm3)	19
Hardness (HV 0,01)	90-100
Thickness (um)	0,1-0,2
Appearance	Shiny
Color	Pink
