

## GP1-2N 2N yellow gold pen plating solution

- Gold pen plating solution
- 2N or 18 kt yellow gold color
- Great for two-tone plating applications
- Good color repeatability
- Used to cover solder joints
- Nickel, lead, and cadmium free

GP1-2N is a yellow gold pen plating solution which deposits a brilliant 2N gold color to the surface applied. 2N can be described as a pale yellow with green undertones and considered to match 18 kt yellow gold plating in most international markets. It is a perfect solution to for two-tone plating applications where a pale gold color is required. It can also be used to highlight specific details or cover solder joints on 2N gold colored or 18 kt gold items. This yellow gold pen plating solution is nickel, lead, and cadmium free, and despite being a traditional cyanide based alkaline chemical, it is easily transported given the toxic level contained is below the limit established by international transportation laws.

Metal concentration	<b>1 g/ 100 ml</b>
Volume	<b>100 ml</b>
Purity (%)	<b>99.999</b>
Density (g/cm3)	<b>19.6</b>
