

CONDUCTING AND FORMING SALTS FOR GF GOLD PLATING

Colour **Gray**

[L: a: b: c:]

Product description

GF-SF is a salt that is to be dissolved in demineralized water, which is part of the products composing the GF series of flash gold galvanic plating processes, developed by Legor Plating Division. The starting product is an absolutely atoxic replenishing salt, of extremely easy and convenient usage.

Recommended applications

GF-SF is supplied as a base product in salt form, to which potassium cyanide is added for usage in alkaline gold plating solutions. Preparation of the final replenisher is very easy.
